

I have 1.

Who has $12 + 5$?

I have 17.

Who has $2 + 3$?

I have 5.

Who has $5 + 6$?

I have 11.

Who has $4 + 3$?

I have 7.

Who has $5 + 4$?

I have 9.

Who has $1 + 1$?

I have 2.

Who has $7 + 6$?

I have 13.

Who has $3 + 7$?

I have 10.

Who has $3 + 5$?

I have 8.

Who has $12 + 4$?

I have 16.

Who has $15 + 3$?

I have 18.

Who has $2 + 1$?

I have 3.

Who has $8 + 7$?

I have 15.

Who has $1 + 3$?

I have 4.

Who has $11 + 3$?

I have 14.

Who has $7 + 5$?

I have 12.

Who has $4 + 2$?

I have 6.

Who has $1 + 0$?

I have- Who has? Addition game- Set 1—Copy on blue paper

I Have- Who Has? Math Game

Object: Develop listening skills
Practice numbers 1-18
Practice simple addition

Number of players: This game was designed for use by the entire class as a sponge activity or a 'ten minute' math activity. There are 18 cards, so the game can be used in a classroom with 18 or fewer students.

Advance preparation: Copy the game cards on green paper. Cut out the game cards, mount on tagboard, and laminate for durability. There are other sets available for use with your class. Color coding the games will make it easier for classroom organization and storage.

Game play directions: Distribute the game cards to the students in a random order. If you have fewer than 18 students, distribute 2 cards to some students so that all of the cards are used. This is a game in the round and all of the cards will be used in play.

Choose one child to begin play by reading aloud the question on his/her card. Do not read the "I have..." sentence at this time. The other students listen to the reader, check their own card, and the answer will be read aloud by the student holding the correct card. The play continues until each card has been read and every child has had the opportunity to participate in play. The game is over when each reader has been able to ask and answer a question.
